the वेदा

More Than Just a Clock

The Vikramaditya Vedic Clock is a modern interpretation of India's ancient system of timekeeping. Inspired by the astronomical heritage of Ujjain and rooted in the principles of the Panchang, it brings traditional concepts of time into one elegant display.

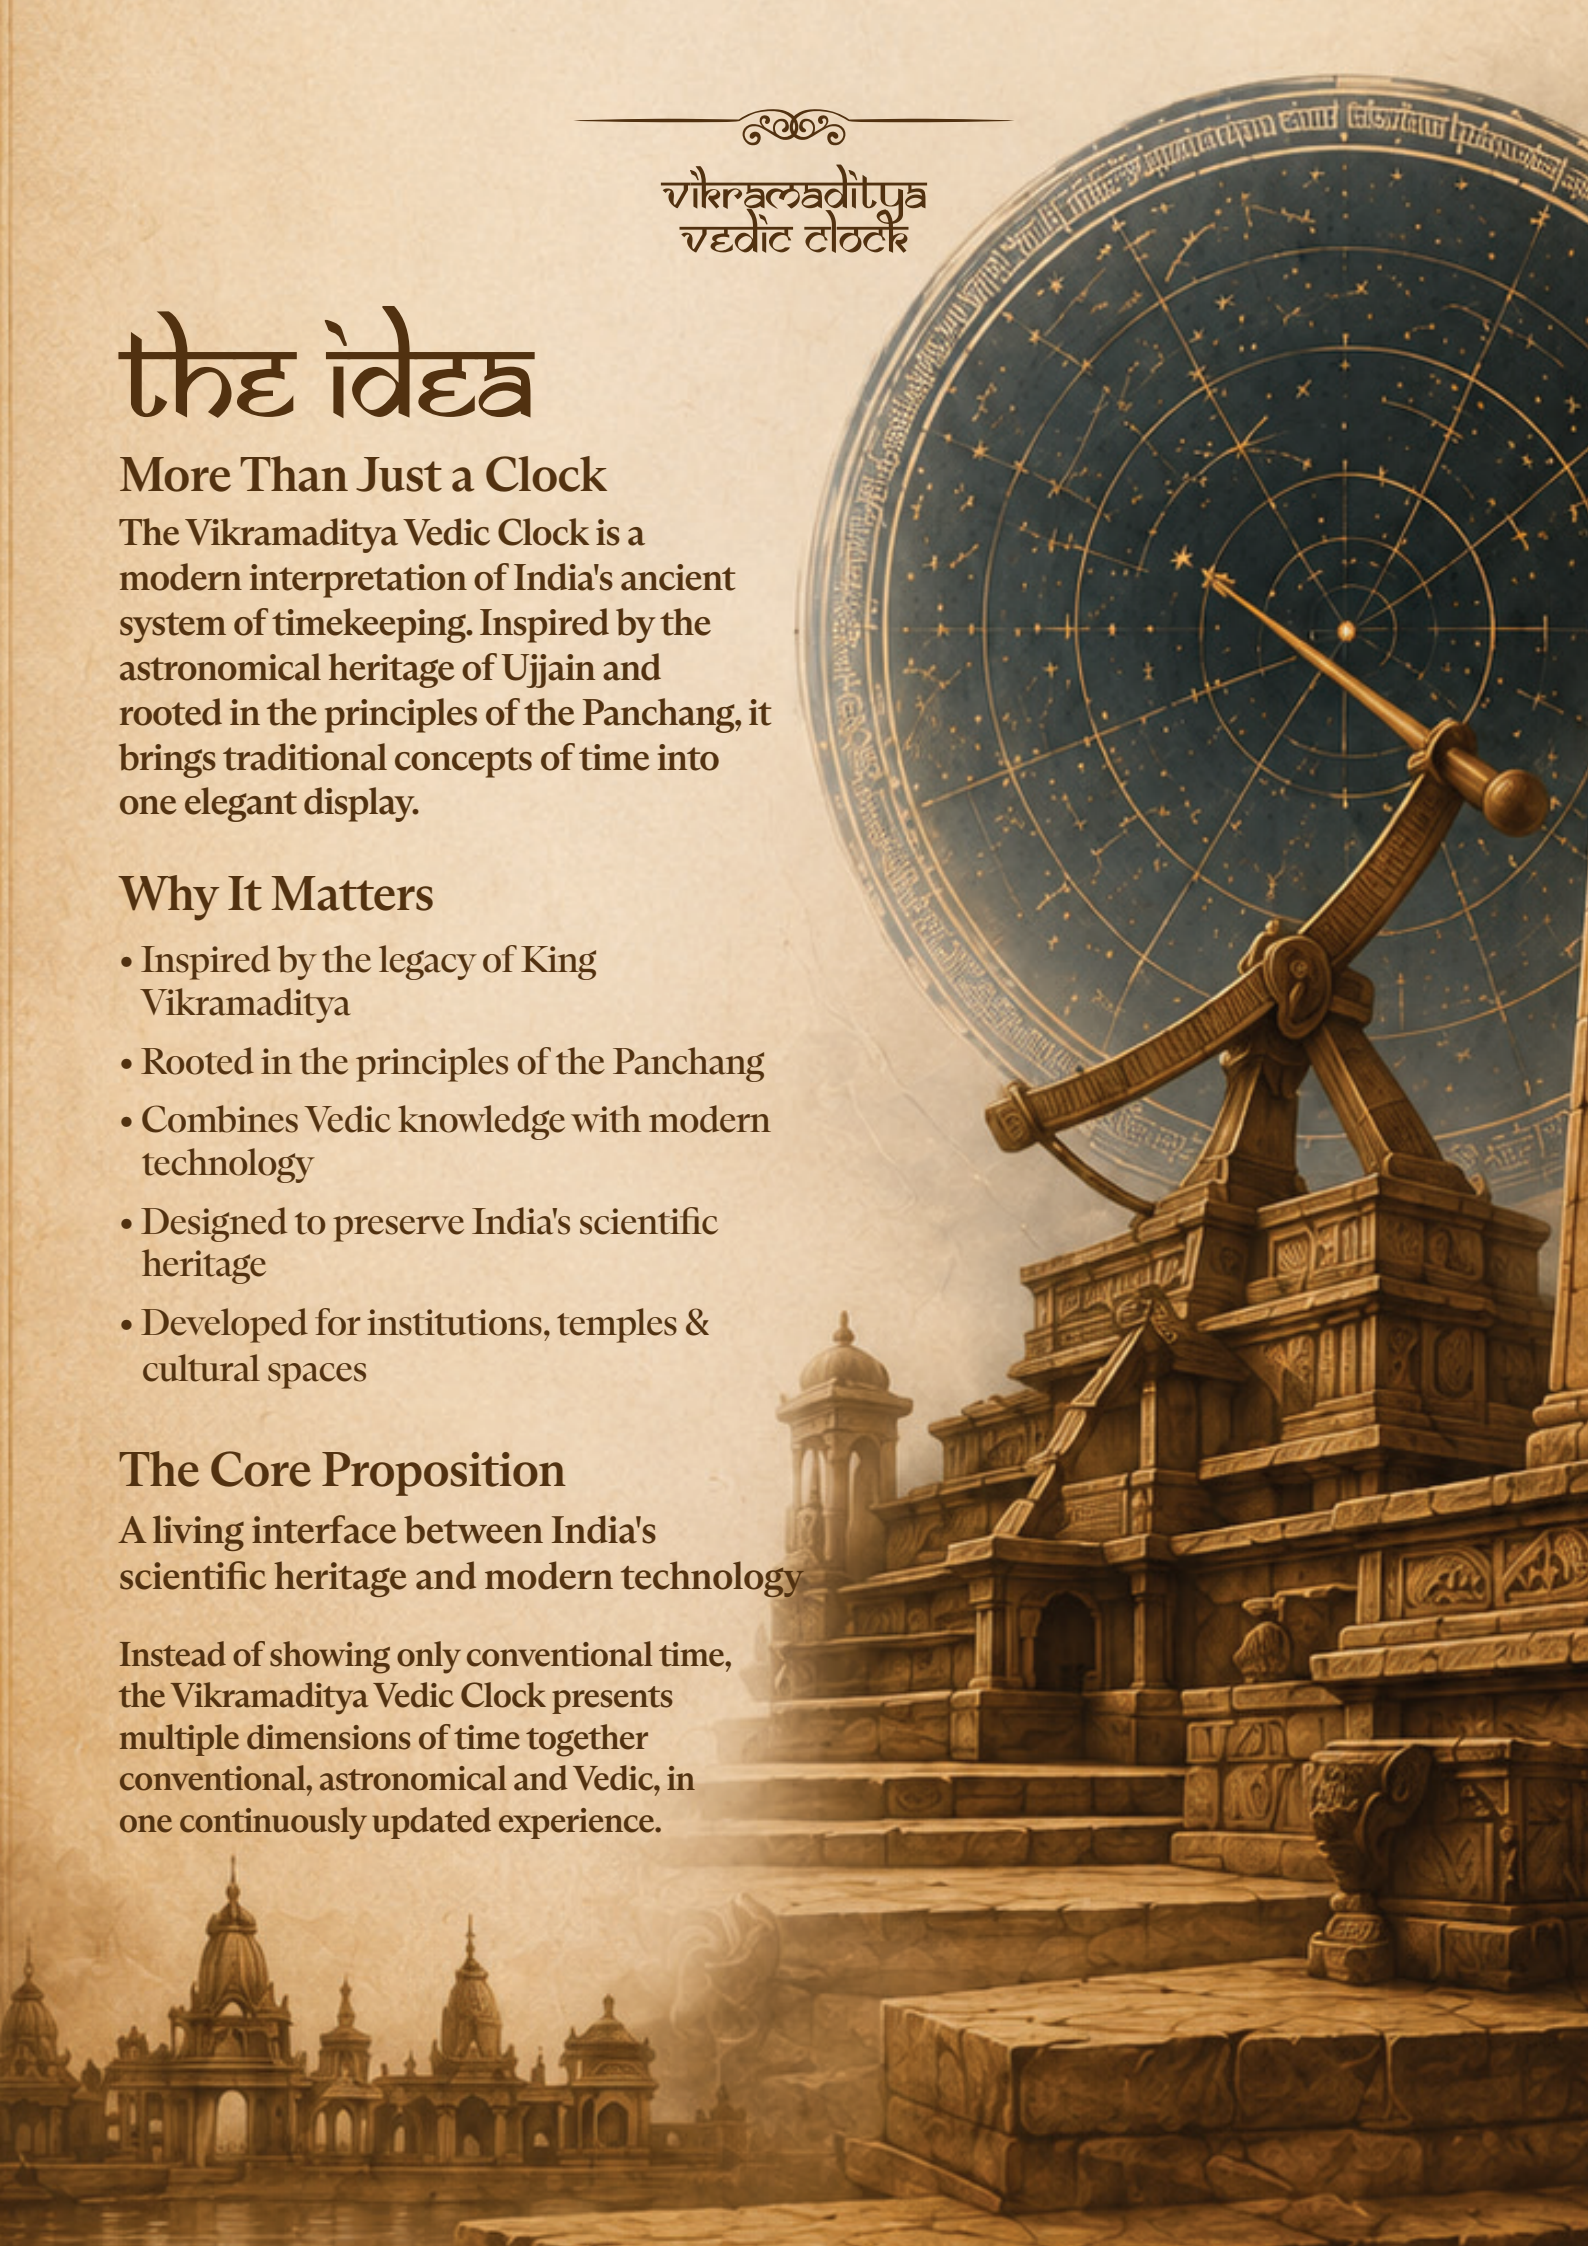

Why It Matters

- Inspired by the legacy of King Vikramaditya
- Rooted in the principles of the Panchang
- Combines Vedic knowledge with modern technology
- Designed to preserve India's scientific heritage
- Developed for institutions, temples & cultural spaces

The Core Proposition

A living interface between India's scientific heritage and modern technology

Instead of showing only conventional time, the Vikramaditya Vedic Clock presents multiple dimensions of time together conventional, astronomical and Vedic, in one continuously updated experience.

our product

Three Dimensions of Time.
One Intelligent Display.

Real-time Panchang information through
intelligent astronomical calculations.

Vedic Time

- Tithi
- Nakshatra
- Yoga
- Karana
- Rashi

Astronomical Information

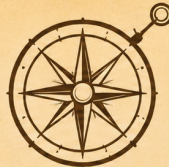

- Sunrise
- Sunset
- Moon Phase

Traditional Time Guidance

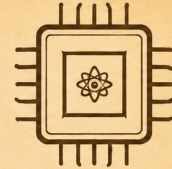

- Muhurta
- Kala & Kashtha
- Vara (Weekday)
- Festivals
- Vikram Samvat Year & Lunar

From Location to Vedic Time

Engineered for accuracy. Crafted for Heritage.

01 LOCATION

GPS-based location identification enables the clock to provide location-specific timings.

02 ASTRONOMICAL CALCULATIONS

Astronomical calculations determine the relevant time and celestial indicators for the selected location and date.

03 PANCHANG INFORMATION

The calculated information is translated into relevant Panchang and traditional time indicators.

04 LIVE DISPLAY

The clock presents the information in an accessible, continuously updated format.

Key Features

- Real-time Panchang
- GPS-based calculations
- Multilingual
